discover which  
**eye cream**  
is best for you

- dr. mary lupu, dermatologist

philosophy skin care newsletter

welcome to our third edition of the  
philosophy skin care newsletter.

our esteemed dermatologist, dr. mary lupu, is back to provide her professional insights on the importance of eye creams and how to discover which eye cream is best for you.

dr. lupu is not only an expert, she is a board certified dermatologist and a nationally renowned educator in the field of cosmetic dermatology.

which eye cream is right  
for you?

an eye cream is a good choice at any age. the delicate skin around the eyes reveals signs of aging faster than any other part of the face. at first, it shows dark circles, under-eye bags and fine lines. eventually, those lines turn into deep wrinkles. using an eye cream will help address these concerns. it's never too early or too late to start using an eye cream to help prevent and reduce the signs of aging.

i love to recommend philosophy's eye creams. they are formulated with results-driven ingredients and unique, skin-smoothing textures specifically designed for the delicate skin around the eyes. the multitasking formulas address multiple concerns, like the signs of aging and fatigue, while helping to prevent future concerns. each philosophy eye cream targets a different combination of concerns, so you can find the formula that's best for you at any age and any stage.

high-performance  
retinoid

new!

## advanced signs of aging

under-eye bags, dark circles and deep wrinkles

dermatologists have long believed in the benefits of retinoids for addressing multiple signs of aging; however, retinoid usage around the eyes has been traditionally avoided due to the sensitivity of this delicate area. now, philosophy is setting a new gold standard for eye care by incorporating the anti-aging power of their breakthrough retinoid technology in **miracle worker** miraculous anti-aging retinoid eye repair. this supreme anti-aging treatment for eyes features hpr,

high-performance retinoid, to deliver all the benefits of retinoid with less potential for irritation. targeted peptides work to diminish the look of dark circles and under-eye bags. vitamin c helps support natural collagen and reduce the look of discoloration, while gaba and soft focus technology instantly help smooth the look of wrinkles.

## multiple signs of aging

fine lines, dark circles and puffiness

if you're showing multiple signs of aging that are not advanced, i recommend philosophy's **eye hope** multitasking eye cream for dark circles, puffiness & lines. this multitasking eye cream provides multiple anti-aging benefits around the delicate eye area with clinically proven results. in just six weeks, 4 out of 5 people saw significant improvement in fine lines, dark circles, puffiness and smoothness. the lightweight, multitasking formula provides moisturization to the sensitive skin around the eyes, depuffing benefits that calm and soothe skin, and light diffusing properties to help brighten skin tone. it's the ultimate multitasker for eyes.

## basic anti-aging eye cream

loss of firmness and moisture

if you're noticing the first signs of aging around the eyes, such as loss of firmness and moisture, then i recommend philosophy's **hope in a tube** eye and lip firming cream. it is the perfect eye cream for basic anti-aging eye care. this rich, moisturizing eye cream intensely hydrates and provides immediate skin-smoothing benefits upon application. the formula incorporates a synergistic blend of topical vitamins e and c to help firm and revitalize the delicate skin around the eyes and upper lip.

## signs of fatigue

puffiness and dark circles

philosophy also offers an eye cream that addresses signs of fatigue, like puffiness and dark circles. **eyes wide open** instant refreshing and depuffing eye gel was created to help refresh tired, puffy eyes. this lightweight, clear eye gel visibly depuffs the eye area, while revitalizing extracts refresh dull, tired eyes for a brighter, more awake appearance. the refreshing formula features hyaluronic acid to hydrate and smooth for more youthful looking skin. **eyes wide open** is great for morning use to help wake up tired looking eyes. i also recommend pairing it with another philosophy eye cream in the evening if you wish to address both the signs of fatigue and the signs of aging.
